

## Dr. Chih-Li Sung

---

*Department of Statistics and Probability, Michigan State University*  
*email: [sungchih@msu.edu](mailto:sungchih@msu.edu)*  
*website: <https://chihli.github.io/>*

Experience	<b>Assistant Professor</b>	2018 - Present
	Department of Statistics and Probability, Michigan State University, U.S.A.	
	<b>Visiting Assistant Professor</b>	May - July, 2022
	Department of Statistics, National Cheng Kung University, Taiwan	
	<b>Graduate Research Assistant</b>	2014 - 2018
	Georgia Institute of Technology, U.S.A.	
	<b>Research Assistant</b>	2013 - 2014
	Academia Sinica, Taiwan	
	<b>Statistical Engineer</b>	2010 - 2013
	Walsin Lihwa Corp., Taiwan	
Education	<b>Ph.D. in Industrial Engineering</b>	2014 - 2018
	Major in Statistics, Minor in Computer Science Georgia Institute of Technology, U.S.A. Thesis title: <i>Contributions to binary-output computer experiments and large-scale computer experiments</i> Advisors: Profs. C. F. Jeff Wu and Benjamin Haaland	
	<b>M.S. in Statistics</b>	2008 - 2010
	National Tsing Hua University, Taiwan	
	<b>B.S. in Applied Mathematics</b>	2004 - 2008
	National Tsing Hua University, Taiwan	
Research Interests	Computer Experiments, Experimental Designs, Uncertainty Quantification, Machine Learning, Big Data, and Applications of Statistics in Engineering	
Grants	<ul style="list-style-type: none"><li>• <a href="#">NSF DMS 2338018</a> (PI, 06/01/2024 - 05/31/2029, \$423,591), <i>CAREER: Single-Fidelity vs. Multi-Fidelity Computer Experiments: Unveiling the Effectiveness of Multi-Fidelity Emulation.</i></li><li>• <a href="#">NSF DMS 2113407</a> (PI, 07/01/2021 - 06/30/2024, \$142,009), <i>Collaborative Research: Efficient Bayesian Global Optimization with Applications to Deep Learning and Computer Experiments.</i> This project is in collaboration with Dr. Ying Hung at Rutgers University.</li></ul>	
Editorial Services	• <b>Associate Editor</b>	
	- Technometrics	2022 - present
	- Computational Statistics & Data Analysis	2021 - present

## Publications

<sup>†</sup> Supervised student

18. Lin, W.-A.<sup>†</sup>, **Sung, C.-L.**, and Chen, R.-B. (2024+). Category tree Gaussian process for computer experiments with many-category qualitative factors and application to cooling system design.  
*Journal of Quality Technology*, accepted.  
(C. Z. Wei Memorial Award from CIPS in 2022)
17. **Sung, C.-L.**, Wang, W., Ding, L., and Wang, X. (2024+). Mesh-clustered Gaussian process emulator for partial differential equation boundary value problems.  
*Technometrics*, accepted.
16. **Sung, C.-L.**, Wang, W., Cakoni, F., Harris, I., and Hung, Y. (2024). Functional-input Gaussian processes with applications to inverse scattering problems.  
*Statistica Sinica*, 34(4), in press.
15. **Sung, C.-L.**, Ji, Y., Mak, S., Wang, W., and Tang, T. (2024). Stacking designs: designing multifidelity computer experiments with target predictive accuracy.

<sup>†</sup> Supervised student

- **Spring Research Conference Travel Award** May 2016  
SRC, Illinois Institute of Technology
- **Hacklytics: Go Back Home Safe** April 2016  
(3rd Place) Data Science at Georgia Tech
- **Government Scholarship to Study Abroad** August 2015  
Ministry of Education, Taiwan
- **Dr. Chen Wen-Chen Statistics Science Thesis Award** June 2010  
Dr. Chen Wen-Chen Memorial Foundation

## Teaching

- **Instructor**, Michigan State University
  - **STT481: Capstone in Statistics** 2018, 2019, 2020, 2021, 2022, 2023  
Student evaluation (average of SIRS form; 1 is the best and 5 is the worst):
 

2018 Fall	2019 Spring	2019 Fall	2020 Spring	2020 Fall
1.638	1.537	1.680	1.665	1.612
2021 Spring	2021 Fall	2022 Spring	2022 Fall	2023 Spring
1.598	1.713	1.392	1.919	1.560
  - **STT801: Design of Experiments** 2021, 2022, 2023  
Student evaluation (average of SIRS form; *1 is the best* and 5 is the worst):
 

2021 Spring	2022 Spring	2023 Spring
1.340	1.498	1.205
  - **STT997: Advanced Topics in Statistics** 2024 Spring  
Student evaluation (average of SPLS form; *5 is the best*): 4.5
- **Graduate Teaching Assistant**, Georgia Institute of Technology
  - ISYE6413: Design and Analysis of Experiments January 2017
  - ISYE3770: Statistics and Applications August 2015

## Mentorship

*STT*: Department of  
Statistics and  
Probability at MSU

- **Ph.D. Students**
  - Andrews Boahen (*STT*) 2024-present
  - Romain Boutelet (*STT*, co-supervised with Prof. Andrew O. Finley) 2023-present
  - Chun-Yi Chang (*STT*) 2022-present
  - Junoh Heo (*STT*) 2021-present
  - Wei-Ann Lin (*NCKU*, primary advisor: Prof. Ray-Bing Chen) 2019-present
- **Masters-level Students**
  - Haojun Yang (*STT*) 2021-2022
  - Chun-Yi Chang (*STT*, Current position: Ph.D. student at MSU) 2021-2022
  - Kun Xia (*STT*) 2021-2022
  - Wei Chen (*Florida Tech*, Primary advisor: Prof. Xingjian Wang) 2020-2021
  - Ashton Pallottini (*STT*, Current position: Ph.D. student at U. of Chicago) 2019-2020
  - Jinwon Park (*STT*) 2019-2019

- **Undergraduate-level Students**
  - Chungmin Lee (*Yonsei University*) 2024-present
  - Aditya Pendyala (*STT*) 2024-present
  - Noah Jankowski (*STT*) 2021-2022
- **MSU IMPACTS Trainees**
  - Duncan Boren (*BMB*, primary advisor: Prof. Josh Vermaas) 2022-present
  - Joshua Kaste (*Plant Biology*, primary advisor: Prof. Yair Shachar-Hill) 2020-2021

<b>Panel Review</b>	<ul style="list-style-type: none"> <li>• National Science Foundation (2022, 2024)</li> </ul>
<b>Conference/ Workshop Activities</b>	<ul style="list-style-type: none"> <li>• Organizing the workshop: “UQ and Trustworthy AI Algorithms for Complex Systems and Social Good” March 2025</li> <li>• Organizing the session at JSM: “Recent Advances in Active Learning and Bayesian Optimization” August 2024</li> </ul>
<b>Educational Outreach</b>	<ul style="list-style-type: none"> <li>• <b>12th Annual MSU Science Festival</b> April 2024 Our lab hosted an engaging event: “Rolling the Dice: Unveiling Normal Distributions” as part of the MSU Science Festival. Our booth provided a fun and hands-on learning experience, helping learners of all ages understand the concept of normal distribution through fun and interactive games.</li> <li>• <b>REU exchange program</b> 2024 Spring I had the honor of mentoring an exchange student from Xian University, alongside three talented MSU undergraduate students. As part of this program, I had the privilege of supervising an undergraduate research project titled “March Machine Learning Mania 2024,” fostering innovation and exploration in the realm of machine learning.</li> <li>• <b>Gifted Education Symposium</b> November 2023 I shared my career journey and applications of statistics and AI, as well as future opportunities in these areas, with junior high school students in Penghu, Taiwan.</li> </ul>
<b>Software</b>	<ol style="list-style-type: none"> <li>7. Heo, J. and <b>Sung, C.-L.</b> (2023). <b>RNAmf</b>: Recursive Non-Additive Emulator for Multi-Fidelity Data. ## Talks

Invited talks are  
boldfaced

### • 2024

1. **2024 International Conference for Statistics and Data Science** (July). *Stacking designs: designing multifidelity computer experiments with target predictive accuracy.*
2. **The 28th South Taiwan Statistics Conference** (June). *Active learning for a recursive non-additive emulator for multi-fidelity computer experiments.*
3. **Seminar, Department of Mathematics and Statistics, University of Massachusetts Amherst** (April). *Stacking designs: designing multifidelity computer experiments with target predictive accuracy.*

### • 2023

1. **Annual Meeting and Conference of Chinese Statistical Association** (December). *Stacking designs: designing multi-fidelity computer experiments with target predictive accuracy.*
2. **Seminar, Institute of Statistical Science, Academia Sinica** (October). *Active learning for a recursive non-additive emulator for multi-fidelity computer experiments.*
3. **Seminar, Department of Statistics, National Chengchi University** (October). *Stacking designs: designing multi-fidelity computer experiments with target predictive accuracy.*
4. **Seminar, TAMIDS, Texas A&M University** (August). *Stacking designs: designing multi-fidelity computer experiments with target predictive accuracy.*
5. **Industry 4.0 Technology Implementation workshop** (August). *Statistical emulation, calibration, and optimization for digital twin.*
6. **EcoSta 2023, Tokyo, Japan** (August). *Functional-input Gaussian processes with applications to inverse scattering problems.*
7. **ISI World Statistics Congress 2023** (July). *mcGP: mesh-clustered Gaussian process emulator for partial differential equation systems.*
8. **ICSA Applied Statistics Symposium 2023** (June). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*

9. **Spring Research Conference 2023** (May). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
  10. **Seminar, University of St Andrews, Scotland** (January). *When epidemic models meet statistics: understanding COVID-19 outbreak.*
- **2022**
    1. **AISC 2022, UNC Greensboro** (October). *Functional-input Gaussian processes with applications to inverse scattering problems.*
    2. **Seminar, Virginia Tech** (September). *Stacking designs: designing multi-fidelity computer experiments with confidence.*
    3. **JSM 2022 Conference, Washington DC** (August). *When epidemic models meet statistics: understanding the impact of weather and government interventions on COVID-19 outbreak.*
    4. **Seminar, Academia Sinica, Taiwan** (July). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
    5. **EcoSta 2022, Kyoto, Japan** (June). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
    6. **Seminar, National Tsing Hua University, Taiwan** (May). *When epidemic models meet statistics: understanding COVID-19 outbreak.*
  - **2021**
    1. **INFORMS 2021 Conference** (October). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*
    2. **JSM 2021 Conference** (August). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*
    3. **JSM 2021 Conference** (August). *Multi-level emulator for multi-fidelity simulations.*
    4. **UQ Seminar, Academy of Mathematics and Systems Science, Chinese Academy of Sciences** (January). *Computer experiments with binary time series and applications to cell biology: modeling, emulation and calibration.*
  - **2020**
    1. **JSM 2020 Conference** (August). *Calibration of inexact computer models with heteroscedastic errors.*
    2. **Seminar, University of California, Los Angeles** (February). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
    3. **Colloquium, Michigan State University** (January). *Applications of computer experiments: emulation and calibration.*
  - **2019**
    1. **INFORMS 2019 Conference** (October). *A clustered Gaussian process model with an application to solar irradiance emulation.*
    2. **INFORMS 2019 Conference** (October). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
    3. **ICOSDA 2019** (October). *Exploiting variance reduction potential in local Gaussian process search.*
    4. **ICISE 2019** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
    5. **EcoSta 2019** (June). *Exploiting variance reduction potential in local Gaussian process search.*

6. **The 28th South Taiwan Statistics Conference** (June). *Exploiting variance reduction potential in local Gaussian process search.*
  7. **Seminar, Academia Sinica, Taiwan** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
  8. **Seminar, National Tsing Hua University, Taiwan** (May). *Computer Experiments with Binary Time Series and Applications to Cell Biology: modeling, estimation and calibration.*
  9. **Research Colloquium, Purdue University** (February). *Applications of computer experiments: emulation and calibration.*
- **2018**
    1. **INFORMS 2018 Conference** (October). *An efficient surrogate model for emulation and physics extraction of large eddy simulations.*
    2. **Workshop on Computer Experiments, Academia Sinica, Taiwan** (July). *Calibration for computer experiments with binary responses.*
    3. **SIAM UQ** (April). *Calibration for computer experiments with binary responses.*
  - **2017**
    1. **INFORMS 2017 Conference** (October). *A generalized Gaussian process model for computer experiments with binary time series.*
    2. **Georgia Statistics Day, Emory University** (October). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
    3. **JSM 2017 Conference** (July). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
    4. **ISBIS Meeting** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments* (poster presentation).
    5. **SPUQ Workshop** (May). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
    6. **NAE Regional Meeting** (April). *Surrogate modeling and data-driven physics extraction of large-eddy simulations* (poster presentation).
  - **2016:**
    1. **ICSA Symposium** (June). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
    2. **SRC Conference** (May). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
