

Dr. Chih-Li Sung

Department of Statistics and Probability, Michigan State University
email: sungchih@msu.edu
website: <https://chihli.github.io/>

Experience	Assistant Professor	2018 - Present
	Department of Statistics and Probability, Michigan State University, U.S.A.	
	Visiting Assistant Professor	May - July, 2022
	Department of Statistics, National Cheng Kung University, Taiwan	
	Graduate Research Assistant	2014 - 2018
	Georgia Institute of Technology, U.S.A.	
	Research Assistant	2013 - 2014
	Academia Sinica, Taiwan	
	Statistical Engineer	2010 - 2013
	Walsin Lihwa Corp., Taiwan	
Education	Ph.D. in Industrial Engineering	2014 - 2018
	Major in Statistics, Minor in Computer Science Georgia Institute of Technology, U.S.A. Thesis title: <i>Contributions to binary-output computer experiments and large-scale computer experiments</i> Advisors: Profs. C. F. Jeff Wu and Benjamin Haaland	
	M.S. in Statistics	2008 - 2010
	National Tsing Hua University, Taiwan	
	B.S. in Applied Mathematics	2004 - 2008
	National Tsing Hua University, Taiwan	
Research Interests	Computer Experiments, Experimental Designs, Uncertainty Quantification, Machine Learning, Big Data, and Applications of Statistics in Engineering	
Grants	<ul style="list-style-type: none">• NSF DMS 2338018 (PI, 06/01/2024 - 05/31/2029, \$423,591), <i>CAREER: Single-Fidelity vs. Multi-Fidelity Computer Experiments: Unveiling the Effectiveness of Multi-Fidelity Emulation.</i>• NSF DMS 2113407 (PI, 07/01/2021 - 06/30/2024, \$142,009), <i>Collaborative Research: Efficient Bayesian Global Optimization with Applications to Deep Learning and Computer Experiments.</i> This project is in collaboration with Dr. Ying Hung at Rutgers University.	
Editorial Services	• Associate Editor	
	- Technometrics	2022 - present
	- Computational Statistics & Data Analysis	2021 - present

Awards	<ul style="list-style-type: none"> • NSF CAREER Award December 2023 National Science Foundation • QSR Best Student Paper Winner October 2023 (Student: Junoh Heo) INFORMS • IMS New Researchers Travel Award April 2023 Institute of Mathematical Statistics • Full Membership in Sigma Xi October 2021 The Scientific Research Honor Society • Statistics in Physical Engineering Sciences (SPES) Award August 2019 American Statistical Association • Alice and John Jarvis, Ph.D. Student Research Award April 2018 (Honorable Mention) Stewart School of ISyE, Georgia Tech • Best Student Poster Winner October 2017 (1st Prize) Georgia Statistics Day, Emory University • Best Student Poster Winner June 2017 ISBIS Meeting, the IBM Watson Research Center • Spring Research Conference Travel Award May 2016 SRC, Illinois Institute of Technology • Hacklytics: Go Back Home Safe April 2016 (3rd Place) Data Science at Georgia Tech

- **Government Scholarship to Study Abroad** August 2015
Ministry of Education, Taiwan
- **Dr. Chen Wen-Chen Statistics Science Thesis Award** June 2010
Dr. Chen Wen-Chen Memorial Foundation

Teaching

- **Instructor**, Michigan State University
 - **STT481: Capstone in Statistics** 2018, 2019, 2020, 2021, 2022, 2023
Student evaluation (average of SIRS form; 1 is the best and 5 is the worst):

2018 Fall	2019 Spring	2019 Fall	2020 Spring	2020 Fall
1.638	1.537	1.680	1.665	1.612
2021 Spring	2021 Fall	2022 Spring	2022 Fall	2023 Spring
1.598	1.713	1.392	1.919	1.560

- **STT801: Design of Experiments** 2021, 2022, 2023
Student evaluation (average of SIRS form; 1 is the best and 5 is the worst):

2021 Spring	2022 Spring	2023 Spring
1.340	1.498	1.205

- **Graduate Teaching Assistant**, Georgia Institute of Technology
 - ISYE6413: Design and Analysis of Experiments January 2017
 - ISYE3770: Statistics and Applications August 2015

Mentorship

STT: Department of
Statistics and
Probability at MSU

- **Ph.D. Students**
 - Romain Boutelet (*STT*, co-supervised with Prof. Andrew O. Finley) 2023-present
 - Chun-Yi Chang (*STT*) 2022-present
 - Junoh Heo (*STT*) 2021-present
 - Wei-Ann Lin (*NCKU*, primary advisor: Prof. Ray-Bing Chen) 2019-present
- **Masters-level Students**
 - Haojun Yang (*STT*) 2021-2022
 - Chun-Yi Chang (*STT*, Current position: Ph.D. student at MSU) 2021-2022
 - Kun Xia (*STT*) 2021-2022
 - Wei Chen (*Florida Tech*, Primary advisor: Prof. Xingjian Wang) 2020-2021
 - Ashton Pallottini (*STT*, Current position: Ph.D. student at U. of Chicago) 2019-2020
 - Jinwon Park (*STT*) 2019-2019
- **Undergraduate-level Students**
 - Noah Jankowski (*STT*) 2021-2022
- **MSU IMPACTS Trainees**
 - Duncan Boren (*BMB*, primary advisor: Prof. Josh Vermaas) 2022-present
 - Joshua Kaste (*Plant Biology*, primary advisor: Prof. Yair Shachar-Hill) 2020-2021

Dissertation Committee Service

STT: Department of
Statistics and
Probability at MSU

Software

7. Heo, J. and **Sung, C.-L.** (2023). **RNAmf**: Recursive Non-Additive Emulator for Multi-Fidelity Data. R package version 0.1.0.
6. **Sung, C.-L.** (2023). **MRFA**: Fitting and Predicting Large-Scale Nonlinear Regression Problems using Multi-Resolution Functional ANOVA (MRFA) Approach. R package version 0.6.
5. **Sung, C.-L.** (2023). **mcGP**: Mesh-clustered Gaussian process. R package version 0.1.
4. **Sung, C.-L.** (2022). **HetCalibrate**: Calibration of Inexact Computer Models with Heteroscedastic Errors. R package version 0.2.
3. **Sung, C.-L.** (2022). **GPcluster**: Clustered Gaussian Process. R package version 0.1.
2. **Sung, C.-L.** (2018). **calibrateBinary**: Calibration for Computer Experiments with Binary Responses. R package version 0.1.
1. **Sung, C.-L.** (2017). **binaryGP**: Fitting and Predicting a Gaussian Process Model with (Time-Series) Binary Response. R package version 0.2.

Talks

Invited talks are
boldfaced

- **2023**
 1. **Annual Meeting and Conference of Chinese Statistical Association** (December). *Stacking designs: designing multi-fidelity computer experiments with target predictive accuracy.*
 2. **Seminar, Institute of Statistical Science, Academia Sinica** (October). *Active learning for a recursive non-additive emulator for multi-fidelity computer experiments.*
 3. **Seminar, Department of Statistics, National Chengchi University** (October). *Stacking designs: designing multi-fidelity computer experiments with target predictive accuracy.*
 4. **Seminar, TAMIDS, Texas A&M University** (August). *Stacking designs: designing multi-fidelity computer experiments with target predictive accuracy.*
 5. **Industry 4.0 Technology Implementation workshop** (August). *Statistical emulation, calibration, and optimization for digital twin.*
 6. **EcoSta 2023, Tokyo, Japan** (August). *Functional-input Gaussian processes with applications to inverse scattering problems.*

7. **ISI World Statistics Congress 2023** (July). *mcGP: mesh-clustered Gaussian process emulator for partial differential equation systems.*
 8. **ICSA Applied Statistics Symposium 2023** (June). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
 9. **Spring Research Conference 2023** (May). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
 10. **Seminar, University of St Andrews, Scotland** (January). *When epidemic models meet statistics: understanding COVID-19 outbreak.*
- **2022**
 1. **AISC 2022, UNC Greensboro** (October). *Functional-input Gaussian processes with applications to inverse scattering problems.*
 2. **Seminar, Virginia Tech** (September). *Stacking designs: designing multi-fidelity computer experiments with confidence.*
 3. **JSM 2022 Conference, Washington DC** (August). *When epidemic models meet statistics: understanding the impact of weather and government interventions on COVID-19 outbreak.*
 4. **Seminar, Academia Sinica, Taiwan** (July). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
 5. **EcoSta 2022, Kyoto, Japan** (June). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
 6. **Seminar, National Tsing Hua University, Taiwan** (May). *When epidemic models meet statistics: understanding COVID-19 outbreak.*
 - **2021**
 1. **INFORMS 2021 Conference** (October). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*
 2. **JSM 2021 Conference** (August). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*
 3. **JSM 2021 Conference** (August). *Multi-level emulator for multi-fidelity simulations.*
 4. **UQ Seminar, Academy of Mathematics and Systems Science, Chinese Academy of Sciences** (January). *Computer experiments with binary time series and applications to cell biology: modeling, emulation and calibration.*
 - **2020**
 1. **JSM 2020 Conference** (August). *Calibration of inexact computer models with heteroscedastic errors.*
 2. **Seminar, University of California, Los Angeles** (February). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
 3. **Colloquium, Michigan State University** (January). *Applications of computer experiments: emulation and calibration.*
 - **2019**
 1. **INFORMS 2019 Conference** (October). *A clustered Gaussian process model with an application to solar irradiance emulation.*
 2. **INFORMS 2019 Conference** (October). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
 3. **ICOSDA 2019** (October). *Exploiting variance reduction potential in local Gaussian process search.*

4. **ICISE 2019** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
 5. **EcoSta 2019** (June). *Exploiting variance reduction potential in local Gaussian process search.*
 6. **The 28th South Taiwan Statistics Conference** (June). *Exploiting variance reduction potential in local Gaussian process search.*
 7. **Seminar, Academia Sinica, Taiwan** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
 8. **Seminar, National Tsing Hua University, Taiwan** (May). *Computer Experiments with Binary Time Series and Applications to Cell Biology: modeling, estimation and calibration.*
 9. **Research Colloquium, Purdue University** (February). *Applications of computer experiments: emulation and calibration.*
- **2018**
 1. **INFORMS 2018 Conference** (October). *An efficient surrogate model for emulation and physics extraction of large eddy simulations.*
 2. **Workshop on Computer Experiments, Academia Sinica, Taiwan** (July). *Calibration for computer experiments with binary responses.*
 3. **SIAM UQ** (April). *Calibration for computer experiments with binary responses.*
 - **2017**
 1. **INFORMS 2017 Conference** (October). *A generalized Gaussian process model for computer experiments with binary time series.*
 2. **Georgia Statistics Day, Emory University** (October). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
 3. **JSM 2017 Conference** (July). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
 4. **ISBIS Meeting** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments* (poster presentation).
 5. **SPUQ Workshop** (May). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
 6. **NAE Regional Meeting** (April). *Surrogate modeling and data-driven physics extraction of large-eddy simulations* (poster presentation).
 - **2016:**
 1. **ICSA Symposium** (June). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
 2. **SRC Conference** (May). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
