| | | |
|----------------------------------|--|------------------|
| Experience | Assistant Professor | 2018 - Present |
| | Department of Statistics and Probability, Michigan State University, U.S.A. | |
| | Visiting Assistant Professor | May - July, 2022 |
| | Department of Statistics, National Cheng Kung University, Taiwan | |
| | Graduate Research Assistant | 2014 - 2018 |
| | Georgia Institute of Technology, U.S.A. | |
| | Research Assistant | 2013 - 2014 |
| | Academia Sinica, Taiwan | |
| | Statistical Engineer | 2010 - 2013 |
| | Walsin Lihwa Corp., Taiwan | |
| Education | Ph.D. in Industrial Engineering | 2014 - 2018 |
| | Major in Statistics, Minor in Computer Science Georgia Institute of Technology, U.S.A. Thesis title: <i>Contributions to binary-output computer experiments and large-scale computer experiments</i> Advisors: Profs. C. F. Jeff Wu and Benjamin Haaland | |
| | M.S. in Statistics | 2008 - 2010 |
| | National Tsing Hua University, Taiwan | |
| | B.S. in Applied Mathematics | 2004 - 2008 |
| | National Tsing Hua University, Taiwan | |
| Research Interests | Computer Experiments, Experimental Designs, Uncertainty Quantification, Machine Learning, Big Data, and Applications of Statistics in Engineering | |
| Grants | <ul style="list-style-type: none">NSF DMS 2113407 (PI, 07/01/2021 - 06/30/2024, \$142,009), <i>Collaborative Research: Efficient Bayesian Global Optimization with Applications to Deep Learning and Computer Experiments</i>. This project is in collaboration with Dr. Ying Hung at Rutgers University. | |

|-------------|-------------|
| 1.340 | 1.498 |

• Graduate Teaching Assistant, Georgia Institute of Technology

- ISYE6413: Design and Analysis of Experiments January 2017
- ISYE3770: Statistics and Applications August 2015

Mentorship

STT: Department of Statistics and Probability at MSU

• Ph.D. Students

- Romain Boutelet (*STT*) 2023-present
- Chun-Yi Chang (*STT*) 2022-present
- Junoh Heo (*STT*) 2021-present
- Wei-Ann Lin (*NCKU*, primary advisor: Prof. Ray-Bing Chen) 2019-present

• Masters-level Students

- Haojun Yang (*STT*) 2021-2022
- Chun-Yi Chang (*STT*, Current position: Ph.D. student at MSU) 2021-2022
- Kun Xia (*STT*) 2021-2022
- Wei Chen (*Florida Tech*, Primary advisor: Prof. Xingjian Wang) 2020-2021
- Ashton Pallottini (*STT*, Current position: Ph.D. student at U. of Chicago) 2019-2020
- Jinwon Park (*STT*) 2019-2019

• Undergraduate-level Students

- Noah Jankowski (*STT*) 2021-2022

• MSU IMPACTS Trainees

- Duncan Boren (*BMB*, primary advisor: Prof. Josh Vermaas) 2022-present
- Joshua Kaste (*Plant Biology*, primary advisor: Prof. Yair Shachar-Hill) 2020-2021

Dissertation Committee Service

STT: Department of
Statistics and
Probability at MSU

- Anirban Samaddar (*STT*, in progress)
- Mookyoung Son (*STT*, in progress)
- Zi Li (*ECE*, in progress)
- Xuran Wang (*CEPSE*, in progress)
- Haoxiang Feng (*STT*, in progress)
- Abhijnan Chattopadhyay (*STT*, 2022). Decode phenome-genome interactions: a data science approach.
- Runze Su (*STT*, 2022). Machine learning towards data with complex structures.
- Ibrahim Kekec (*Economics*, 2021). Essays on discrete multivalued treatments with endogeneity and heterogeneous counterfactual errors.
- Juna Goo (*STT*, 2020). A spatio-temporal model for white matter tractography in diffusion tensor imaging.
- Wei Chen (*Florida Tech*, master thesis, 2020). A modified peng-robinson cubic equation of state based on Bayesian framework.

Awards

- **IMS New Researchers Travel Award** April 2023
Institute of Mathematical Statistics
- **Full Membership in Sigma Xi** October 2021
The Scientific Research Honor Society
- **Statistics in Physical Engineering Sciences (SPES) Award** August 2019
American Statistical Association
- **Alice and John Jarvis, Ph.D. Student Research Award** April 2018
(Honorable Mention) Stewart School of ISyE, Georgia Tech
- **Best Student Poster Winner** October 2017
(1st Prize) Georgia Statistics Day, Emory University
- **Best Student Poster Winner** June 2017
ISBIS Meeting, the IBM Watson Research Center
- **Spring Research Conference Travel Award** May 2016
SRC, Illinois Institute of Technology
- **Hacklytics: Go Back Home Safe** April 2016
(3rd Place) Data Science at Georgia Tech
- **Government Scholarship to Study Abroad** August 2015
Ministry of Education, Taiwan
- **Dr. Chen Wen-Chen Statistics Science Thesis Award** June 2010
Dr. Chen Wen-Chen Memorial Foundation

Software

6. **Sung, C.-L.** (2023). **mcGP**: Mesh-clustered Gaussian process. R package version 0.1.
5. **Sung, C.-L.** (2022). **HetCalibrate**: Calibration of Inexact Computer Models with Heteroscedastic Errors. R package version 0.2.
4. **Sung, C.-L.** (2022). **GPcluster**: Clustered Gaussian Process. R package version 0.1.
3. **Sung, C.-L.** (2019). **MRFA**: Fitting and Predicting Large-Scale Nonlinear Regression Problems using Multi-Resolution Functional ANOVA (MRFA) Approach. R package version 0.4.
2. **Sung, C.-L.** (2018). **calibrateBinary**: Calibration for Computer Experiments with Binary Responses. R package version 0.1.
1. **Sung, C.-L.** (2017). **binaryGP**: Fitting and Predicting a Gaussian Process Model with (Time-Series) Binary Response. R package version 0.2.

Talks

Invited talks are
boldfaced

- **2023**

1. **Seminar, University of St Andrews, Scotland** (January). *When epidemic models meet statistics: understanding COVID-19 outbreak.*

- **2022**

1. **AISC 2022, UNC Greensboro** (October). *Functional-input Gaussian processes with applications to inverse scattering problems.*
2. **Seminar, Virginia Tech** (September). *Stacking designs: designing multi-fidelity computer experiments with confidence.*
3. **JSM 2022 Conference, Washington DC** (August). *When epidemic models meet statistics: understanding the impact of weather and government interventions on COVID-19 outbreak.*
4. **Seminar, Academia Sinica, Taiwan** (July). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
5. **EcoSta 2022, Kyoto, Japan** (June). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*
6. **Seminar, National Tsing Hua University, Taiwan** (May). *When epidemic models meet statistics: understanding COVID-19 outbreak.*

- **2021**

1. **INFORMS 2021 Conference** (October). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*
2. **JSM 2021 Conference** (August). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*
3. **JSM 2021 Conference** (August). *Multi-level emulator for multi-fidelity simulations.*
4. **UQ Seminar, Academy of Mathematics and Systems Science, Chinese Academy of Sciences** (January). *Computer experiments with binary time series and applications to cell biology: modeling, emulation and calibration.*

- **2020**

1. **JSM 2020 Conference** (August). *Calibration of inexact computer models with heteroscedastic errors.*
2. **Seminar, University of California, Los Angeles** (February). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
3. **Colloquium, Michigan State University** (January). *Applications of computer experiments: emulation and calibration.*

- **2019**

1. **INFORMS 2019 Conference** (October). *A clustered Gaussian process model with an application to solar irradiance emulation.*
2. **INFORMS 2019 Conference** (October). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
3. **ICOSDA 2019** (October). *Exploiting variance reduction potential in local Gaussian process search.*
4. **ICISE 2019** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
5. **EcoSta 2019** (June). *Exploiting variance reduction potential in local Gaussian process search.*

6. **The 28th South Taiwan Statistics Conference** (June). *Exploiting variance reduction potential in local Gaussian process search.*
 7. **Seminar, Academia Sinica, Taiwan** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
 8. **Seminar, National Tsing Hua University, Taiwan** (May). *Computer Experiments with Binary Time Series and Applications to Cell Biology: modeling, estimation and calibration.*
 9. **Research Colloquium, Purdue University** (February). *Applications of computer experiments: emulation and calibration.*
- **2018**
 1. **INFORMS 2018 Conference** (October). *An efficient surrogate model for emulation and physics extraction of large eddy simulations.*
 2. **Workshop on Computer Experiments, Academia Sinica, Taiwan** (July). *Calibration for computer experiments with binary responses.*
 3. **SIAM UQ** (April). *Calibration for computer experiments with binary responses.*
 - **2017**
 1. **INFORMS 2017 Conference** (October). *A generalized Gaussian process model for computer experiments with binary time series.*
 2. **Georgia Statistics Day, Emory University** (October). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
 3. **JSM 2017 Conference** (July). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
 4. **ISBIS Meeting** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments* (poster presentation).
 5. **SPUQ Workshop** (May). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
 6. **NAE Regional Meeting** (April). *Surrogate modeling and data-driven physics extraction of large-eddy simulations* (poster presentation).
 - **2016:**
 1. **ICSA Symposium** (June). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
 2. **SRC Conference** (May). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
