Dr. Chih-Li Sung

Department of Statistics and Probability, Michigan State University
email: sungchih@msu.edu
website: https://chihli.github.io/

Experience		
	Assistant Professor	2018 - Present
	Department of Statistics and Probability, Michigan State University, U.S.A.	
	Visiting Assistant Professor	May - July, 2022
	Department of Statistics, National Cheng Kung University, Taiwan	
	Graduate Research Assistant	2014 - 2018
	Georgia Institute of Technology, U.S.A.	
	Research Assistant	2013 - 2014
	Academia Sinica, Taiwan	
	Statistical Engineer	2010 - 2013
	Walsin Lihwa Corp., Taiwan	

Education		
	Ph.D. in Industrial Engineering	2014 - 2018
	Major in Statistics, Minor in Computer Science	
	Georgia Institute of Technology, U.S.A.	
	Thesis title: *Contributions to binary-output computer experiments and large-scale computer experiments*	
	Advisors: Profs. C. F. Jeff Wu and Benjamin Haaland	
	M.S. in Statistics	2008 - 2010
	National Tsing Hua University, Taiwan	
	B.S. in Applied Mathematics	2004 - 2008
	National Tsing Hua University, Taiwan	

Research Interests

Computer Experiments, Experimental Designs, Uncertainty Quantification, Machine Learning, Big Data, and Applications of Statistics in Engineering

Grants

- NSF DMS 2113407 (**PI**, 07/01/2021 - 06/30/2024, \$142,009), *Collaborative Research: Efficient Bayesian Global Optimization with Applications to Deep Learning and Computer Experiments.* This project is in collaboration with Dr. Ying Hung at Rutgers University.

Publications

[†] Joint first authors

12. **Sung, C.-L.**[†], Wang, W.[†], Cakoni, F., Harris, I., and Hung, Y. (2024). Functional-input Gaussian processes with applications to inverse scattering problems. *Statistica Sinica*, accepted.

11. Zhou, M., Chen, W., Su, X., **Sung, C.-L.**, Wang, X., and Ren, Z. (2023). Data-driven modeling of general fluid density under subcritical and supercritical conditions. *AIAA Journal*, 61(4), 1519-1531.

10. **Sung, C.-L.**, Haaland, B., Hwang, Y., and Lu, S. (2023). A clustered Gaussian process model for computer experiments. *Statistica Sinica*, 33(2), 893-918.

9. **Sung, C.-L.**, Barber, B. D., and Walker, B. J. (2022). Calibration of inexact computer models with heteroscedastic errors, *SIAM/ASA Journal on Uncertainty Quantification*, 10(4), 1733-1752.

8. **Sung, C.-L.** (2022). Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak. *Annals of Applied Statistics*, 16(4), 2505-2522.

7. **Sung, C.-L.**[†], Hung, Y.[†], Rittase, W., Zhu, C., and Wu, C. F. J. (2020). Calibration for computer experiments with binary responses and application to cell adhesion study. *Journal of the American Statistical Association*, 115(532), 1664-1674.

6. **Sung, C.-L.**[†], Hung, Y.[†], Rittase, W., Zhu, C., and Wu, C. F. J. (2020). A generalized Gaussian process model for computer experiments with binary time series. *Journal of the American Statistical Association*. 115(530), 945-956.

5. **Sung, C.-L.**[†], Wang, W.[†], Plumlee, M., and Haaland, B. (2020). Multi-resolution functional ANOVA for large-scale, many-input computer experiments. *Journal of the American Statistical Association*. 115(530) 908-919.

4. Chang, Y.-H., Zhang, L., Wang, X., Yeh, S.-T., Mak, S., **Sung, C.-L.**, Wu, C. F. J., and Yang, V. (2019). Kernel-smoothed proper orthogonal decomposition-based emulation for spatiotemporally evolving flow dynamics prediction. *AIAA Journal*, 57(12), 5269-5280.

3. Mak, S.[†], **Sung, C.-L.**[†], Yeh, S.-T., Wang, X., Chang, Y.-C., Joseph, V. R., Yang, V., and Wu, C. F. J. (2018). An efficient surrogate model for emulation and physics extraction of large eddy simulations. *Journal of the American Statistical Association*, 113(524):1443-1456. **(SPES Award from ASA in 2019)**

2. Yeh, S.-T., Wang, X., **Sung, C.-L.**, Mak, S., Chang, Y.-H., Wu, C. F. J., and Yang, V. (2018). Data-driven analysis and mean flow prediction using a physics-based surrogate model for design exploration. *AIAA Journal*, 56(6):2429-2442.

1. **Sung, C.-L.**, Gramacy, R. B., and Haaland, B. (2018). Potentially predictive variance reducing subsample locations in local Gaussian process regression. *Statistica Sinica*, 28(2):577-600.

Submitted Papers

[†] Joint first authors

5. **Sung, C.-L.**, Song, Y., and Hung, Y. (2023). Advancing inverse scattering with surrogate modeling and Bayesian inference for functional inputs, submitted.

4. **Sung, C.-L.**, Wang, W., Ding, L., and Wang, X. (2023). mcGP: mesh-clustered Gaussian process emulator for partial differential equation systems, submitted.

3. **Sung, C.-L.**, Ji, Y., Tang, T., and Mak, S. (2022). Stacking designs: designing multi-fidelity computer experiments with confidence, submitted.

2. **Sung, C.-L.** and Hung, Y. (2022). Efficient calibration for imperfect epidemic models with applications to the analysis of COVID-19, revision submitted.

1. Lin, W.-A.[†], **Sung, C.-L.**[†], and Chen, R.-B. (2022). Category tree Gaussian process for computer experiments with many-category qualitative factors and application to cooling system design, revision submitted. **(C. Z. Wei Memorial Award from CIPS in 2022)**

Conference Proceedings

3. Li, Y., Wang, X., Mak, S., **Sung, C.-L.**, Wu, C. F. J., and Yang, Y. (2018). Novel perspectives of spatial flame transfer function identification and thermo-acoustic instability analysis. In *Proceedings of the 2018 AIAA Propulsion and Energy Forum*.

2. Li, Y., Wang, X., Mak, S., **Sung, C.-L.**, Wu, C. F. J., and Yang, Y. (2018). Uncertainty quantification of flame transfer function under a Bayesian framework. In *Proceedings of the 2018 AIAA Aerospace Sciences Meeting.*

1. Chang, Y.-H., Zhang, L., Wang, X., Yeh, S.-T., Mak, S., **Sung, C.-L.**, Wu, C. F. J., and Yang, Y. (2017). Spatial-temporal flow dynamics prediction with large design space via data-driven analysis and LES-based surrogate model. In *ILASS-Americas 29th Annual Conference on Liquid Atomization and Spray Systems.*

Editorial Services	• **Associate Editor**	
	- Technometrics	2022 - present
	- Computational Statistics & Data Analysis	2021 - present

Teaching

• **Instructor**, Michigan State University

  - **STT481: Capstone in Statistics**   2018, 2019, 2020, 2021, 2022

    Student evaluation (average of SIRS form; 1 is the best and 5 is the worst):

2018 Fall	2019 Spring	2019 Fall	2020 Spring	2020 Fall
1.638	1.537	1.680	1.665	1.612

2021 Spring	2021 Fall	2022 Spring	2022 Fall
1.598	1.713	1.392	1.919

  - **STT801: Design of Experiments**   2021, 2022

    Student evaluation (average of SIRS form; 1 is the best and 5 is the worst):

2021 Spring	2022 Spring
1.340	1.498

• **Graduate Teaching Assistant**, Georgia Institute of Technology

- ISYE6413: Design and Analysis of Experiments	January 2017
- ISYE3770: Statistics and Applications	August 2015

Mentorship

STT: Department of Statistics and Probability at MSU

• **Ph.D. Students**

- Romain Boutelet (*STT*)	2023-present
- Chun-Yi Chang (*STT*)	2022-present
- Junoh Heo (*STT*)	2021-present
- Wei-Ann Lin (*NCKU*, primary advisor: Prof. Ray-Bing Chen)	2019-present

• **Masters-level Students**

- Haojun Yang (*STT*)	2021-2022
- Chun-Yi Chang (*STT*, Current position: Ph.D. student at MSU)	2021-2022
- Kun Xia (*STT*)	2021-2022
- Wei Chen (*Florida Tech*, Primary advisor: Prof. Xingjian Wang)	2020-2021
- Ashton Pallottini (*STT*, Current position: Ph.D. student at U. of Chicago)	2019-2020
- Jinwon Park (*STT*)	2019-2019

• **Undergraduate-level Students**

- Noah Jankowski (*STT*)   2021-2022

- **MSU IMPACTS Trainees**

  - Duncan Boren (*BMB*, primary advisor: Prof. Josh Vermaas)   2022-present
  - Joshua Kaste (*Plant Biology*, primary advisor: Prof. Yair Shachar-Hill)   2020-2021

- Runze Su (*STT*, 2022). Machine learning towards data with complex structures.
- Ibrahim Kekec (*Economics*, 2021). Essays on discrete multivalued treatments with endogeneity and heterogeneous counterfactual errors.
- Juna Goo (*STT*, 2020). A spatio-temporal model for white matter tractography in diffusion tensor imaging.
- Wei Chen (*Florida Tech*, master thesis, 2020). A modified peng-robinson cubic equation of state based on Bayesian framework.

Awards

- **IMS New Researchers Travel Award**   April 2023
  Institute of Mathematical Statistics
- **Full Membership in Sigma Xi**   October 2021
  The Scientific Research Honor Society
- **Statistics in Physical Engineering Sciences (SPES) Award**   August 2019
  American Statistical Association
- **Alice and John Jarvis, Ph.D. Student Research Award**   April 2018
  (Honorable Mention) Stewart School of ISyE, Georgia Tech
- **Best Student Poster Winner**   October 2017
  (1st Prize) Georgia Statistics Day, Emory University
- **Best Student Poster Winner**   June 2017
  ISBIS Meeting, the IBM Watson Research Center
- **Spring Research Conference Travel Award**   May 2016
  SRC, Illinois Institute of Technology
- **Hacklytics: Go Back Home Safe**   April 2016
  (3rd Place) Data Science at Georgia Tech
- **Government Scholarship to Study Abroad**   August 2015
  Ministry of Education, Taiwan
- **Dr. Chen Wen-Chen Statistics Science Thesis Award**   June 2010
  Dr. Chen Wen-Chen Memorial Foundation

Software	6. **Sung, C.-L.** (2023). `mcGP`: Mesh-clustered Gaussian process. `R` package version 0.1.

6. **Sung, C.-L.** (2023). `mcGP`: Mesh-clustered Gaussian process. `R` package version 0.1.

5. **Sung, C.-L.** (2022). `HetCalibrate`: Calibration of Inexact Computer Models with Heteroscedastic Errors. `R` package version 0.2.

4. **Sung, C.-L.** (2022). `GPcluster`: Clustered Gaussian Process. `R` package version 0.1.

3. **Sung, C.-L.** (2019). `MRFA`: Fitting and Predicting Large-Scale Nonlinear Regression Problems using Multi-Resolution Functional ANOVA (MRFA) Approach. `R` package version 0.4.

2. **Sung, C.-L.** (2018). `calibrateBinary`: Calibration for Computer Experiments with Binary Responses. `R` package version 0.1.

1. **Sung, C.-L.** (2017). `binaryGP`: Fitting and Predicting a Gaussian Process Model with (Time-Series) Binary Response. `R` package version 0.2.

Talks

Invited talks are boldfaced

- **2023**

  1. **Seminar, University of St Andrews, Scotland** (January). *When epidemic models meet statistics: understanding COVID-19 outbreak.*

- **2022**

  1. **AISC 2022, UNC Greensboro** (October). *Functional-input Gaussian processes with applications to inverse scattering problems.*

  2. **Seminar, Virginia Tech** (September). *Stacking designs: designing multi-fidelity computer experiments with confidence.*

  3. **JSM 2022 Conference, Washington DC** (August). *When epidemic models meet statistics: understanding the impact of weather and government interventions on COVID-19 outbreak.*

  4. **Seminar, Academia Sinica, Taiwan** (July). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*

  5. **EcoSta 2022, Kyoto, Japan** (June). *Stacking designs: designing experiments for multi-fidelity modeling with confidence.*

  6. **Seminar, National Tsing Hua University, Taiwan** (May). *When epidemic models meet statistics: understanding COVID-19 outbreak.*

- **2021**

  1. **INFORMS 2021 Conference** (October). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*

  2. JSM 2021 Conference (August). *Estimating functional parameters for understanding the impact of weather and government interventions on COVID-19 outbreak.*

  3. **JSM 2021 Conference** (August). *Multi-level emulator for multi-fidelity simulations.*

  4. **UQ Seminar, Academy of Mathematics and Systems Science, Chinese Academy of Sciences** (January). *Computer experiments with binary time series and applications to cell biology: modeling, emulation and calibration.*

- **2020**

  1. JSM 2020 Conference (August). *Calibration of inexact computer models with heteroscedastic errors.*

  2. **Seminar, University of California, Los Angeles** (February). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*

  3. Colloquium, Michigan State University (January). *Applications of computer experiments: emulation and calibration.*

- **2019**

  1. **INFORMS 2019 Conference** (October). *A clustered Gaussian process model with an application to solar irradiance emulation.*
  2. **INFORMS 2019 Conference** (October). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
  3. **ICOSDA 2019** (October). *Exploiting variance reduction potential in local Gaussian process search.*
  4. **ICISE 2019** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
  5. **EcoSta 2019** (June). *Exploiting variance reduction potential in local Gaussian process search.*
  6. **The 28th South Taiwan Statistics Conference** (June). *Exploiting variance reduction potential in local Gaussian process search.*
  7. **Seminar, Academia Sinica, Taiwan** (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
  8. **Seminar, National Tsing Hua University, Taiwan** (May). *Computer Experiments with Binary Time Series and Applications to Cell Biology: modeling, estimation and calibration.*
  9. **Research Colloquium, Purdue University** (February). *Applications of computer experiments: emulation and calibration.*

- **2018**

  1. **INFORMS 2018 Conference** (October). *An efficient surrogate model for emulation and physics extraction of large eddy simulations.*
  2. **Workshop on Computer Experiments, Academia Sinica, Taiwan** (July). *Calibration for computer experiments with binary responses.*
  3. **SIAM UQ** (April). *Calibration for computer experiments with binary responses.*

- **2017**

  1. INFORMS 2017 Conference (October). *A generalized Gaussian process model for computer experiments with binary time series.*
  2. Georgia Statistics Day, Emory University (October). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
  3. JSM 2017 Conference (July). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments.*
  4. ISBIS Meeting (June). *Multi-resolution functional ANOVA for large-scale, many-input computer experiments* (poster presentation).
  5. SPUQ Workshop (May). *A generalized Gaussian process model for computer experiments with binary time series* (poster presentation).
  6. NAE Regional Meeting (April). *Surrogate modeling and data-driven physics extraction of large-eddy simulations* (poster presentation).

- **2016**:

  1. ICSA Symposium (June). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
  2. SRC Conference (May). *Potentially predictive variance reducing subsample locations in local Gaussian process regression.*
